Weekly Report 3

Group Members:
Cole Troutman
Patrick Braud
Ryan Daily

Week 3 work accomplished

In Meeting:
Overall we got a nice start into the UI for the database project. Created the database for the project as well as a few forms for the input values. Discussed ER model corrections that we need to make as well as any changes that we felt would make the project easier. We divided up some of the queries that we will each be working on for the first prototype and interview. We also scheduled our face-to-face interview time.

Patrick Braud:
- Gave a lecture on php, xampp, and html
- Created working html page for the group to build on.
- Created forms for the different accounts (faculty/staff, professor, business manager)

Cole Troutman:
- Updated the forms for each account
- Wrote the weekly report
- Created database
- Brainstorm query ideas for each account

Ryan:
- Added tables to database
- Exported tables via SQL to group members
- Made some fixes to the ER model

Work to have done by next meeting:
- Some of the basic queries
- Working prototype
- Cleaner UI design

Next Meeting:
Tuesday, April 21, 2015
